Subject: FW: Question for Mr. Benadeto

Mike –

Just an FYI – Nino is working out of town so he asked me to bring these questions to the meeting on Tuesday, June 5th. I have invited the Chamber Board members as well as Mayor/council and Commissioner Phil Mitchell.

Susan

Subject: Question for Mr. Benadeto

Susan,
Here is my questions for Mr. Benadeto:

Why do you talk about community involvement with the CFAC site yet not let interested members of the community be directly involved with the discussion and analysis of phase 1 findings before approving the start of phase 2 and the toxicology document. This project needs a TAG! There is no transparency or proof written comments were ever considered or how they were incorporated.

Question 2:

Phase 1 identified leaking dumps yet phase 2 apparently doesn't sample the unknown contents of the leakers or provide tracer studies to show where or which dumps this material is leaking from or too. In the interest of common sense why don't you do these studies now instead of getting to phase 3 and find that no one in the community wants you to leave the waste buried in the groundwater flow. Study it now and shave several years off the length of time needed to return this site to a more beneficial use than a continuous pollution leak into the Flathead River.

Thank you for helping to ask these questions if you get an opportunity.

Nino
